

Kyle Richardson

Front-End Software Developer with years of experience who utilizes modern JavaScript while building responsive websites and features to boost business growth and improve UX.

EXPERIENCE

Botany.io, Seattle, WA — Co-Founder / Front End Engineer

July 2019 - March 2021

Founding member of a SaaS/Slack platform that helps developers grow in their career, and engineering teams to work together more effectively.

Built and implemented new features requested from early users.

Selected and managed react component library.

Helped iteratively define and document front end development guidelines and best practices

Used React, Node, GraphQL, and Typescript to build web and slack apps.

Howard Schultz, Seattle, WA — Front End Engineer

May 2019 - June 2019

Served as part of a development team to help Howard Schultz, the former CEO of Starbucks, explore a potential run for President of the United States.

Built customer facing campaign website using Gatsby, Netlify, and Netlify CMS

Created custom canvassing app with Next.js, GraphQL, and Postgres

Tirebuyer.com, Kirkland, WA — Front End Developer

May 2017 - May 2019

Implemented Jest unit testing and snapshots for front end code base.

Converted mockups into interactive features and responsive design, using HTML/CSS and JavaScript.

Used Vue.js to build out mobile ecommerce pages.

Maintained, fixed bugs, and added features in React and Redux for Rubbr.com app.

Seattle Mailing Bureau, Renton, WA

June 2009 - May 2017

716 S Cushman Ave
Tacoma, WA 98405
(360) 870-7070
